■ Prompt Chain Documentation

Project Title: Can AI Replace YouTubers? I Tested It Out!

Goal: Use AI tools (ChatGPT, DALL·E/MidJourney, Canva, InVideo/Pictory) to generate the full YouTube video (script, thumbnail, and final edit).

■ Step 1: Idea & Title Generation (ChatGPT)

Prompt 1:

Generate 5 engaging YouTube video title ideas about using AI to create full YouTube content (script, thumbnail, editing). Make them catchy, clickable, and under 60 characters.

Selected Output:

Can AI Replace YouTubers? I Tested It Out!

■ Step 2: Script Writing (ChatGPT)

Prompt 2:

Write a YouTube video script (800–1000 words) for the title: 'Can AI Replace YouTubers? I Tested It Out!' Make it conversational, engaging, and structured into intro, sections, and outro. Include humor, audience engagement, and natural flow.

Output:

1 Intro (hook)
2 Setting the challenge
3 Script generation by AI
4 Thumbnail creation by AI
5 Video editing by AI
6 Final verdict
7 Outro & call-to-action

■ Step 3: Thumbnail Concept (DALL·E / MidJourney / Canva)

Prompt 3:

Create a YouTube thumbnail for the video titled 'Can AI Replace YouTubers? I Tested It Out!' Style: Bright, bold, modern. Show a split-screen with a human YouTuber on one side and a futuristic AI robot on the other. Add big clickable text: 'AI vs YouTuber'.

Output:

3–5 AI-generated thumbnail mockups. Chosen design enhanced in Canva with bold text + background contrast.

■ Step 4: Video Editing (Pictory / InVideo)

Prompt 4:

Take this script and automatically generate a video using stock footage, AI voiceover, captions, and background music. Style: Engaging, modern YouTube content. Length: 7–8 minutes.

Output:

Draft video automatically created with AI narration, clips, and captions. Manual adjustments: timing, music volume, clip selection.

■ Step 5: Final Review & Human Touch

• Added personal commentary & reactions.
• Refined transitions and timing.
• Exported final YouTube video.

■ Deliverables Generated:

1   Prompt chain documentation (this doc)

2   Full script (~1000 words)

3   AI-generated thumbnails + Canva mockup

4   Final edited AI-powered video
